

Simplicity through technology

For Print Apply, Evolabel means Sustainability, Safety, Uptime and Lower Costs.

Sustainability

Evolabel assists you in meeting your sustainability objectives. Whether thermal transfer, thermal direct, compostable label, recyclable plastic label or liner, the innovative controlled automatic torque system (CATS) with only 3 rollers lets you choose the most sustainable label for the application.

“ We needed a print apply unit that could readily handle a wide range of label types. Evolabel met or exceeded our expectations in every case. ”

Mark Dingley, CEO, Matthews Australasia

Personnel Safety

Whether a simple tamp carton applicator or a pallet labeller, Evolabel makes it safe. Evolabels BlowVac applicator uses air instead of mechanics, the Quick-Tamp senses height automatically stopping at the right distance and FlexWipe Pallet System feels any human interventions.

“ ..it applies the labels without any moving parts. This makes it live up to our high safety requirements, without any expensive and cumbersome safety covers. ”

Hugo Lavoie, Technical Supervisor, L'Oréal Canada

Uptime – Always Ready

High uptime through quick-simple no-tool required printhead and label roll changeovers. Low downtime achieved by a minimalistic modular design with clear standard service procedures. In short, you can count on Evolabel “Simplicity through Technology” to make sure your line is always running.

“Before, we had a lot of downtime. ...the increased uptime we have today far surpasses our projections.”

Torbjörn Wiechert, Project Manager, Arla Foods, Sweden

Low Operational Costs

Automatic warnings for required maintenance (e.g. clean print head) cuts wear - fewer printheads. Your choice of label partner can save label costs. Quick-simple operations keep high uptime and save manpower costs. Evolabel continues to innovate to make your overall cost of ownership the lowest possible.

“...we noticed that the life time of the print heads is much longer on the Evolabel systems than it was on our previous systems.”

Aram Sabir, Production Leader, Kronfågel, Sweden
